
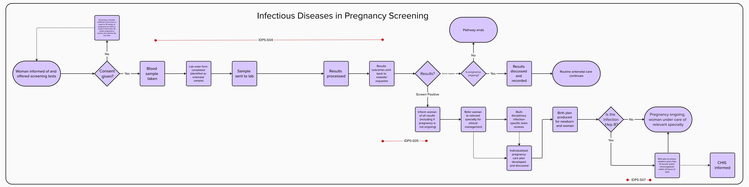
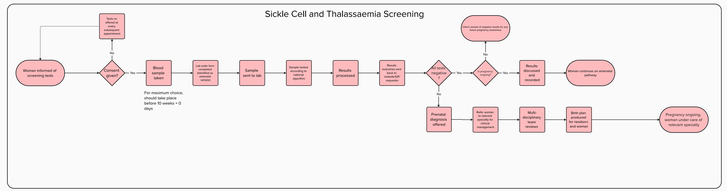
To Note:

- Although the trimester mapping shows weeks and weeks where a screening event happens, in reality they can happen at any point in those weeks and in a lot of cases, happen on the same day in one appointment

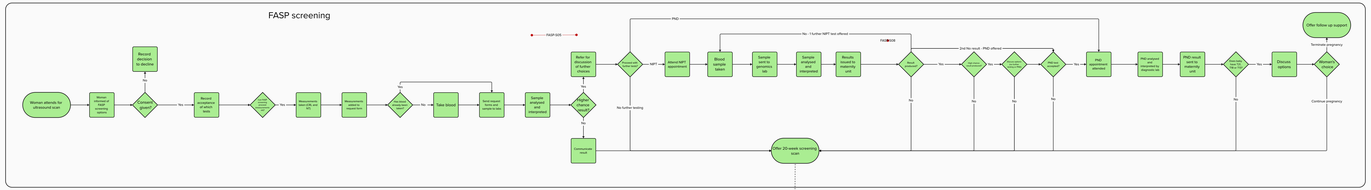
1. EPS-501: coverage, HIV
2. EPS-502: coverage, hepatitis B
3. EPS-503: coverage, syphilis
4. EPS-504: test, turnaround times HIV, hepatitis B, syphilis
5. EPS-505: referral, timeliness to information and testing
6. EPS-506: diagnosis/intervention, timely specialist assessment of women with hepatitis B (newly diagnosed or higher infectivity)
7. EPS-507: intervention/treatment, timely vaccination of exposed hepatitis B infants (if mother hepatitis B)
8. EPS-508: diagnosis/intervention, timely specialist assessment of women with hepatitis B (lower infectivity)



1. SCT-501: coverage, antenatal screening
2. SCT-502: test, timeliness of antenatal screening
3. SCT-503: referral, timeliness of beta angio haemoglobinopathy (FOG)
4. SCT-504: test, turnaround time (antenatal screening)
5. SCT-505: referral, timely offer of prenatal diagnosis, (PND) to women at risk of having an infant with sickle cell or thalassaemia disorders
6. SCT-506: diagnosis at intervention, timeliness of prenatal diagnosis (PND)
7. SCT-507: test, timely reporting of prenatal diagnosis, (PND) results to parents
8. SCT-508: test, timely reporting newborn screen positive results to parents
9. SCT-509: intervention or treatment, timely follow-up, diagnosis and treatment of newborn infants with a positive screening result



1. FASP-501: coverage, T21, T18, T13 screening
2. FASP-502: coverage, fetal anomaly ultrasound
3. FASP-503: test, screen positive rate T21, T18, T13 screening
4. FASP-504: test, detection rate T21, T18, T13, screening
5. FASP-505: test, fetal anomaly ultrasound
6. FASP-506: test, turnaround time T21, T18, T13 screening
7. FASP-507: test, inadequate samples for Down's, syndrome, Edwards' syndrome and Patau's syndrome
8. FASP-508: referral, time to intervention T21, T18, T13 screening
9. FASP-509: referral, time to intervention 18 weeks, plus 0 days to 20 weeks plus 6 days of fetal anomaly ultrasound
10. FASP-509: diagnosis or intervention, diagnostic tests fetal anomaly screening



FASP screening
